

## **Burmatex Reaches Terminal 'Velocity' in Sheffield**

Burmatex's longstanding fibrebonded ranges, academy and cordiale, reaffirmed their status as 'timeless classics' recently when used to create a contemporary interior at Velocity House Business and Conference Centre, Tenter Street, Sheffield.

Working closely with the client, the Burmatex in-house design team devised a scheme that would deliver a first-class feel and value for money on a modest budget. With years of experience in the manufacture of fibrebonded products, the proven performance and fresh colour options with the added benefit of being A+ rated by BRE, meant Burmatex was an obvious choice for Velocity Estates.

Fine-ribbed cordiale carpet tiles in neutral grey were laid broadloom along the corridors with zesty, multicoloured borders in broad-ribbed academy to delineate the glass partitioned offices. These colours were echoed in the reception and meeting areas in loop pile tile, scan and cut pile tile, axis, highlighting the ease of coordination across the entire Burmatex product portfolio.
